358 Anti Climb Fence Single Gate

358 Pedestrian Gate

358 Anti Climb Fence Single Gate is a high-security access point integrated into a 358 anti-climb mesh fence system. It consists of a gate leaf constructed with the same robust 358 mesh as the surrounding fence panel, ensuring consistent security levels. The gate is hinged to a heavy-duty frame, creating a single, solid opening within the fence line.

DESCRIPTION

Height: 1.0m, 1.2m, 1.5m, 1.8m, 2.0m, etc

Width: 0.8m, 1.0m, 1.2m, 1.5m, 2.0m, etc

Mesh Opening: 76.2 * 12.7 mm (3" * 0.5")

Wire Diameter: 3.0mm, 4.0mm, etc.

Frame Tube: 25*25 mm, 30*30 mm

Post: 60*60 mm, 80*80 mm, 100*100 mm

Surface Treatment: Hot Dipped Galvanized, Powder Coated

Color: Silver, Black, Green, etc.

Door Lock Options: Mechanical lock / Facial recognition / Combination lock

This type of gate is used wherever a high-security pedestrian or vehicle access point is required within a 358 anti-climb fence perimeter. Its primary purpose is to provide secure access without compromising the integrity of the barrier.

In summary, a 358 Anti-Climb Mesh Single Gate is an essential component of a complete high-security perimeter system. It provides necessary access while maintaining the formidable barrier required to protect sensitive assets, infrastructure, and personnel.

358 Pedestrian Gates are made from steel with 358 mesh infills, designed for secure pedestrian access through fence lines. Gates are available in a range of heights and widths, with mesh panels fixed to a steel frame and safety features to prevent gate failure. Suitable for manual or electronic locks, with options for automation and additional security toppings.
