Canada Temporary Fence Single Gate

Canada Temporary Fence Single Gate

Swing gates are probably the most requested style of temporary gate. As implied by the name, a swing gate pivots at one end to swing open and closed. To create a swing gate, we use a temporary fencing panel fitted with gate components like a wheel and spacers, which allow the gate to swing freely. Our swing gates are usually built in-line from the same style of temporary fence as the rest of the fence line.

DESCRIPTION
