Corner Gate/Turning Gate

Corner doors are custom-designed for 90° corner spaces, featuring an L-shaped track and a linked sliding design. This achieves a pillar-free, open and airy opening effect at the corner, balancing space utilization with modern aesthetics. They are an ideal partition choice for balconies, living rooms, kitchens, courtyards, and other similar settings. Eliminating the traditional central column at corners, the two door panels connect seamlessly, completely enclosing the space when closed.

Description

Height: 6 Feet

Length: Customers Request

Surface Treatment: Powder Coated

Material: Aluminum, Aluminum Alloy

Application: Residential, Villa, Gate, Factory, Courtyards

Features

✔ **Frameless Corner Design for a Brighter View**

Abandoning the traditional corner pillar, the two doors seamlessly connect, creating a completely enclosed space when closed and a spacious corner opening when open, offering unobstructed views and enhanced natural light.

✔ **Sturdy, Durable and Well-Sealed**

The frame is made of thickened aluminum alloy, offering high strength, wind resistance, and rust resistance. Combined with double-layered tempered glass and sealing strips, it provides sound insulation, heat insulation, waterproofing, and dustproofing, enhancing home comfort.

✔ **Smooth Push-Pull Experience**

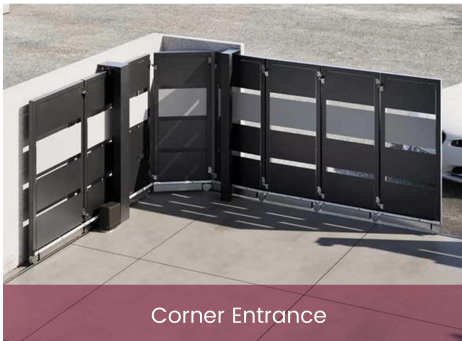

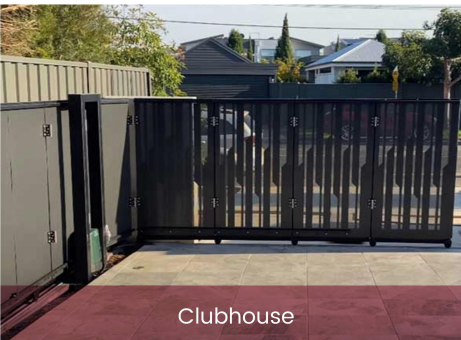

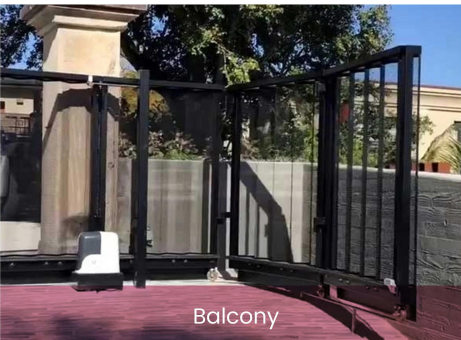

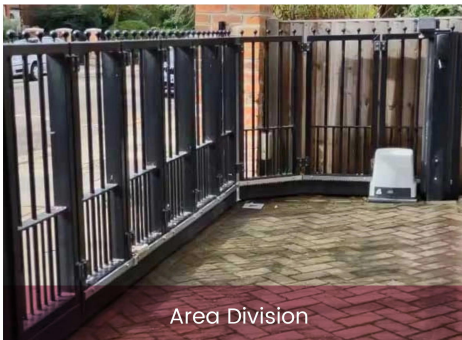

Equipped with silent rollers and high-strength tracks, the doors slide smoothly and effortlessly without jamming or noise. They are resistant to deformation and derailment even after long-term use, requiring minimal effort to open and closing securely.

✔ **Customizable to Diverse Styles**

✔ **Space-Saving and Minimal Footprint**

Features a side-sliding storage design, concealing the doors against the wall when open, saving space in hallways and living areas. Suitable for small apartments and compact spaces.
