Palisade Fence Single Gate

Single Leaf Palisade Gate

Palisade Gate Single Gate is suitable for creating an access point within a Palisade Fencing system to allow small vehicles such as forklifts and cars to enter a site. By installing this Palisade Gate, you can control the accessibility of your site, along with effectively securing your premises when it is closed. You should use the sliding bolt and drop bolt (provided with your gate kit) to secure the Palisade Gate when it is shut, although you may wish to add further protection to your security fencing and Palisade Gate by using a Heavy Duty Padlock to lock it. This security gate is unsuitable for large vehicles.
