WPC Privacy Fence

WPC Privacy Fence represents a significant advancement in outdoor enclosure systems, combining wood fibers and polymers to create a superior alternative to traditional wood or vinyl fencing. This innovative composite material delivers the warm, natural appearance of wood while eliminating its inherent drawbacks. The solid panel design ensures complete privacy, making it ideal for residential gardens, patios, and pool areas where visual screening is desired. Unlike conventional fencing, WPC maintains its structural integrity and aesthetic appeal through years of exposure to sun, rain, and temperature fluctuations.

DESCRIPTION

Name: WPC Privacy Fence

Type: Fencing, Trellis & Gates

Service: instruction book

Name: Wood Plastic Composite Fence

Color: Coffee, Red Wood, Teak wood, Dark Grey, Brown, Chocolate, White
(We can customize color)

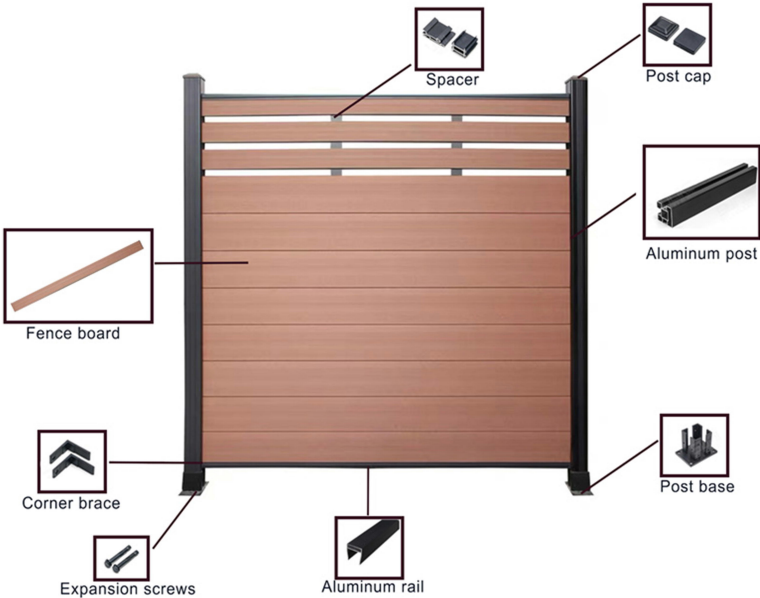

Length: 1.8meters, 2meters

Finishment: Sanded, 3D Embossed, Co-Extruded

Material: 60%Wood + 30%HDPE +10%Additives

MOQ: 50 meters

Sample: Free samples for you (please contact supply)

Engineered for exceptional durability and minimal maintenance, WPC Privacy Fence features excellent resistance to moisture, insects, and UV radiation. The material won't warp, crack, or splinter like natural wood, and requires no painting, staining, or sealing. Available in various colors and textured finishes, from woodgrain patterns to smooth contemporary surfaces, it seamlessly complements any architectural style while providing reliable year-round performance in diverse climate conditions.

The installation system incorporates interlocking panels and concealed fasteners, creating clean lines and a professional finished appearance. Ideal for creating private outdoor retreats, defining property boundaries, or enhancing security around pools and play areas, WPC Privacy Fence represents the perfect balance of form and function. Its long-lasting performance and timeless elegance make it an increasingly popular choice for homeowners seeking both privacy and style in their outdoor living spaces.

How To Install WPC Fences

- 1 Plan Your Layout:** Determine where you want your fence to go. Mark the locations of the corners and where the gate will be. Then, mark the spots where the fence posts will go, usually about 6-8 feet apart.
- 2 Dig Post Holes:** Using a post hole digger, dig holes that are about 2 feet deep and wide enough to accommodate the fence posts.
- 3 Install Fence Posts:** Place the fence posts in the holes. Make sure they are level and straight. Then, fill the holes with concrete mix and let it set according to the instructions on the bag.
- 4 Attach Fence Panels:** Once the concrete has set and the posts are secure, you can start attaching the fence panels. Use screws to secure the panels to the posts. Make sure the panels are level.
- 5 Install the Gate:** If your fence includes a gate, install it according to the manufacturer's instructions. This usually involves attaching the gate to a post with hinges and then installing a latch on the other side.
- 6 Final Touches:** Once all the panels and the gate are installed, walk around the fence and check for any loose panels or screws. Tighten any loose screws and make sure all the panels are secure.

Remember, this is a general guide and the exact process may vary depending on the specific type of WPC fence you have. Always follow the manufacturer's instructions when installing a WPC fence.

DELIEVRY

FEATURES

✔ Natural Wood Appearance

Our WPC fences look and feel like natural wood, adding a rustic charm to your garden.

✔ Insect Resistance

They are highly resistant to mosquitoes and termites.

✔ Environmentally Friendly

They are 100% recycled, saving forest resources.

✔ Durability

They are durable, anti-impact, and have a high density.

✔ Easy Installation

Our fences are easy to install, resulting in low labor cost.

✔ Barefoot Friendly

Our fences are anti-slip and do not crack.

✔ UV-Resistance

Our fences have a high capacity of UV-resistance, ensuring color stability.

✔ Low Maintenance

Our fences require no painting, no glue, and have low maintenance.

✔ Weather Resistant

They are suitable for temperatures ranging from -40 to 60 degrees.
